-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 7 and 20, applicant should clarify what is intended by the ferrite members “being in electrical communication” with the conductor/conduit.

Regarding claims 1 and 20, applicant should clarify the arrangement of the first conductor/conduit relative to the plurality of ferrite members.

Regarding claim 1, applicant should clarify the arrangement of the first conductor relative to the plurality of ferrite members and the plurality of current dividing members. Applicant should clarify what is intended by the plurality of dividing members “being in electrical communication” with the first conductor.

Regarding claim 20, applicant should clarify what is intended by “wherein said first conduit has a shape and a linear length, *said linear length being longer than a distance between said first end and said second end.*”

Claims 2-6 and 8-19 inherit the defects of their respective parent claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2832

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 20, as best understood in view of the rejections under 35 USC 112 second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by Bradstock et al. [US 2,915,707].

Bradstock et al. discloses an assembly [figures 1-3] comprising:

- a first conductor/conduit [15];
- a plurality of ferrite assembly [figure 3] each having a core [22, 23] and a coil winding [18, 19], wherein the coil winding *being in electrical communication with the first conductor;*

and

a plurality of current dividing members [11, 12] *being in electrical communication with the first conductor.*

Allowable Subject Matter

Claim 7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2-6 and 8-19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
